LAWNMOWER 196cc 510mm - POWXG60225

This self-propelled petrol lawnmower with steel housing has a very strong eco driver power engine. It has 5 different speeds for varying conditions of the grass and surface. On top of that the lawnmower has no less than 4 functions. During mowing you can either collect the cuttings directly into the large 60 liter collecting bag, or you can choose for rear discharge or side discharge without use of the grass collector. Finally you can also go for the mulching option. Grass clippings are mulched into very fine pieces which are excellent to feed the soil in your garden.

The desired cutting height can be adjusted in no less than 6 stages between 25mm and 75mm. The cutting width is set at 510mm.
